DIGITAL CONSTRUCTION

REEKON Tools, based in Boston, MA, designs modern construction tools that seamlessly connect the job site. Our products deliver significant improvements in speed, safety, workflows, and error reduction. By capturing real-time data, organizing it through robust software, and enabling seamless execution, REEKON Tools transforms the way professionals work.

REEKON ECOSYSTEM

The REEKON Tools Digital Construction Ecosystem works seamlessly together, out of the box, to provide unprecedented data sharing across the jobsite.

M1 CALIBER

The M1 Caliber Measuring Tool is an augmented tool that clamps directly to your miter saw fence and outputs digital measurements of anything slide underneath it. Speed and accuracy make the M1 the most effective way to complete your cut list in a fraction of the time of using a tape measure. The M1 can measure most English and metric units, output on a large backlit LCD screen, and automatically adjust its spring-loaded arm to measure any flat material.

T1 TOMAHAWK

The world's first, professional grade, digital tape measure enables tradespeople, across industries, to collect measurements faster and more accurately than ever before. A live view, OLED display, shows measurements of the tape measure, digitally, in both english and metric units. With a click of a button, measurements are saved to a side mounted e-paper display.

REEKÖN

P1L TAGGER

The P1L Tagger is a game-changing labeling tool designed to organize and simplify workflows on the modern job site. With seamless integration with the ROCK Jobsite App, the P1L allows users to create, customize, and print labels for materials, safety memos, purchase links, and more—all at the touch of a button. Mark materials, locations, issues, and just about anything with text and scannable QR codes printed on labels as well as directly on materials.

T1^M UTILITY

The T1^M Utility is the most practical and compact digital tape measure ever made. Available in both 16ft and 25ft versions, it accurately displays measurements, boasts over 100 hours of battery life, and is drop-rated to 6 feet—ready for any construction project. It can store over 1,000 measurements in memory, and its removable marking square is perfect for scribing lines.

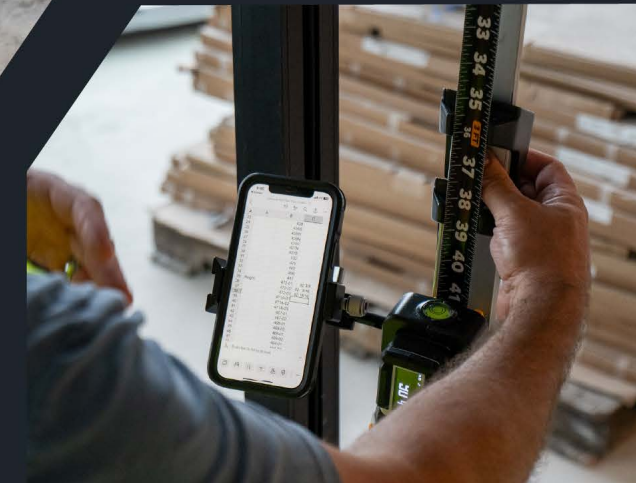

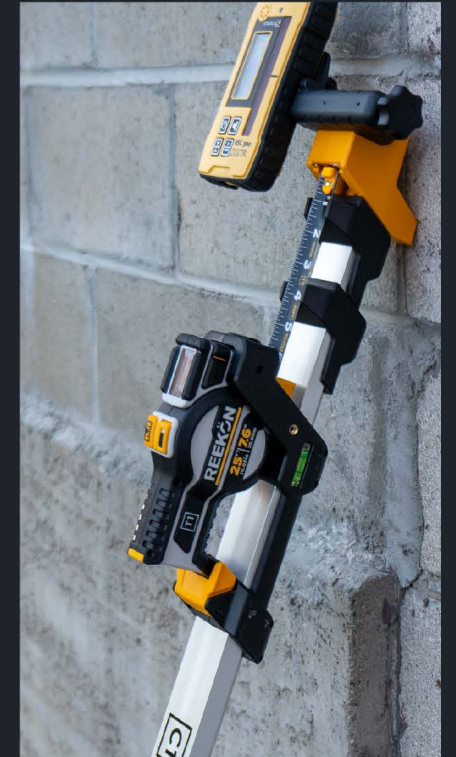

REEKÖN

C1 REACH

The C1 Reach enhances the capabilities of the T1 Tomahawk by incorporating a fixed pole design. With up to 14 feet of extension, it allows users to easily capture internal measurements and ceiling heights. Attach a laser receiver to determine grade variations with a fixed laser line.

REEKÖN

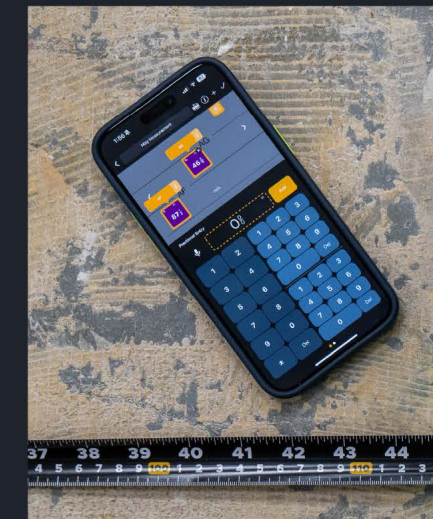

ROCK APP

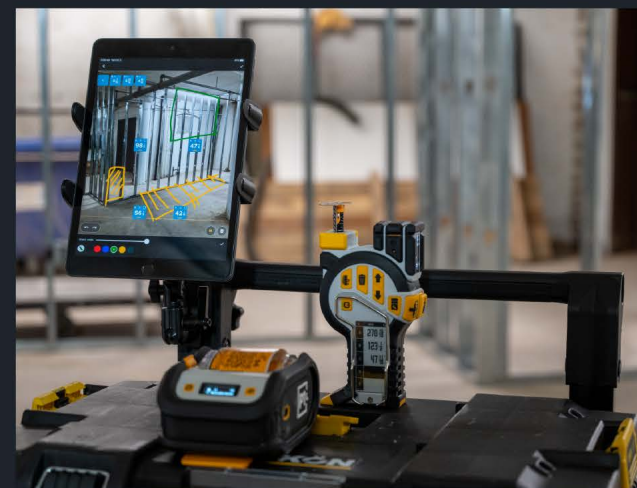

The ROCK Jobsite App is the next-generation construction calculator, covering all job site needs. It features integrated cut lists, automatic measurement sharing, PDF markups, over 50 construction calculators, an integrated fractional calculator, and more—setting the new standard in construction. Share data effortlessly, with all information saved and backed up to the cloud. Compatible with both English and metric units.

Available on iOS and Android.
